

Project Design Phase-I Solution Architecture

Date	12 october 2023
Team ID	NM2023TMID06078
Project Name	Quantitative Analysis of Candidate in 2019 Lok Sabha Elections
Maximum Marks	4 Marks

Solution Architecture:

A solution architecture for the quantitative analysis of candidates in the 2019 Lok Sabha Elections might involve:

Data Ingestion and Integration: Collect and integrate election data from sources, including government databases and external data providers..

Data Processing and Analysis: Utilize data analytics tools to process, clean, and analyze the data, performing tasks like descriptive statistics, correlation analysis, and data visualization.
